

A GROWING MOVEMENT:
AMERICA'S LARGEST
CHARTER SCHOOL
COMMUNITIES

TENTH ANNUAL EDITION NOVEMBER 2015

Charter schools are the fastest-growing choice option in U.S. public education. Over the past five years, student enrollment in charter public schools has grown by 62 percent. In 43 states and the District of Columbia, more than 2.9 million students now attend charter schools —which is more than six percent of the total number of students enrolled in all public schools. The number of districts with a major charter school presence continues to grow, with 14 districts now having 30 percent or more of their students enrolled in charter schools. In more than 160 districts, at least 10 percent of students attend charter public schools. The ten districts with the largest numbers of charter students enroll nearly one-quarter of all charter school students. Due to a successful track record of meeting students' specific needs, parental demand for charter public schools is at an all-time high.

In some communities, the growth of charter public schools has been striking. In the decade after Hurricane Katrina, the New Orleans public school system rebuilt into an almost entirely public charter school system. In New York City, the number of charter students has quadrupled since 2008. The nation's capital also has a sizeable charter school population, enrolling 44 percent of District of Columbia public school students.

This rapid rate of growth should come as no surprise. For nearly 25 years, the charter public school movement has been a leader in innovation and education reform. By unleashing an environment of creativity in states and communities, charter public schools have demonstrated that all children are capable of academic achievement that prepares them to succeed in college, careers, and life. Charter schools have led efforts to eliminate achievement gaps, boost graduation rates and revitalize communities.

Beyond the raw number of students, the charter schools with the top ten charter school enrollment percentages are enrolling students from traditionally underserved backgrounds. More than 80 percent of the students in the top ten highest-enrollment-share districts qualify for free or reduced-priced lunch, while 86 percent are from minority backgrounds.

What's more, the growth of charter public school enrollment can help improve the overall quality of the public school system. The Center for Research on Education Outcomes (CREDO) at Stanford University recently conducted a study on the competitive effects of charter schools within the District of Columbia public school system. The researchers found that charter competition prompted the largest response when the charter competitor quality is above average and the district's enrollment is stable or declining.<sup>1</sup>

For the past ten years, the National Alliance for Public Charter Schools has tracked the growth in charter public school student enrollment. This report identifies communities that have the highest percentage and the highest number of public school students enrolled in charter schools. When families have public school choice, they increasingly select charter public schools over district-run public schools. A 2015 Phi Delta Kappa/Gallup poll indicates that 64 percent of Americans favor charter schools.<sup>2</sup> And with high parental demand for charter schools, enrollment is likely to rise.<sup>3</sup>

In this report, the National Alliance collected public school enrollment data for the 2014-15 school year to identify communities across the country where the highest proportions of students were enrolled in charter public schools. To calculate these proportions, charter schools were mapped to public school districts based on their address and the school district boundaries. This report compares the enrollment of charter public schools located in traditional school district boundaries with districtrun public school enrollment in the same districts, resulting in the "enrollment share" of charter public schools. It is important to note that students sometimes leave the geographic boundaries of the school district in which they live to attend charter schools. However, the comparison between charter public schools and district-run public schools serves as a proxy for where students who are enrolled in charter public schools would likely have enrolled if those schools were not available.

Additional district- and school-level data can be found on the National Alliance's Public Charter School Dashboard: http://dashboard. publiccharters.org/dashboard/home.

# Districts with the Highest Share of Charter School Enrollment

The top ten districts in terms of enrollment share had at least 30 percent of students enrolled in charter public schools in 2014-15. When this report was first published ten years ago, only one district—New Orleans, Louisiana—met this 30 percent benchmark and just six public school districts had at least 20 percent of their students enrolled in charter schools. In 2014-15, there were 14 districts with at least 30 percent of their students attending charters and 45 school districts with a 20 percent enrollment share or more. And, in more than 160 school districts, at least ten percent of public school students attended charter public schools in the past school year.

New Orleans Remains Number One in Market Share. Almost all public school students in New Orleans —93 percent—attended charter public schools in the 2014–15 school year. Not only are charter

schools in New Orleans serving a higher percentage of public school students than anywhere else in the nation, but they have also experienced substantial growth in their performance.<sup>4</sup>

Michigan Has Three Districts in the Top Ten Enrollment Share. Michigan has three school districts listed in the top ten highest percentages of students enrolled in charter public schools, and two of those cities are among the top five: Detroit ranked second (53 percent), Flint ranked third (47 percent), and Grand Rapids tied for ninth (31 percent). In the first enrollment share report that the National Alliance released ten years ago, Detroit tied for fifth (18 percent) and neither Flint nor Grand Rapids were in the top ten.

Six School Districts Have Reached at Least 40 Percent Enrollment Share. For the first time, the share of public school students who attend charter public schools has reached more than 40 percent in Kansas City, Missouri and Gary, Indiana. Enrollment

share in Kansas City has doubled in just ten years. They join New Orleans, Louisiana, Washington, DC, Detroit, Michigan and Flint, Michigan.

Forty-Five School Districts Have a Market Share of 20 Percent or More. When the National Alliance first began ranking school districts, districts with an enrollment share of 20 percent were tied for the fourth-highest position. The number of school districts with at least a 20 percent market share has steadily climbed from six in 2005–06, to 18 in 2010–11, and now 45 in 2014-15. There are now more than 160 school districts with at least a ten percent market share (see Appendix A).

The following tables present charter public school enrollment as the highest percentage of students enrolled (or highest enrollment share) as well as ten-year trends in enrollment share.

#### THE HIGHEST PERCENTAGE OF PUBLIC CHARTER SCHOOL STUDENTS BY SCHOOL DISTRICT, 2014–15

Rank	School District	State	Charter students	Non- charter students	Total	Enrollment Share
1	Orleans Parish School District	LA	42,860	3,340	46,200	93%
2	Detroit City School District	MI	52,420	47,040	99,460	53%

NOTE: Data in this table are from prior editions of this report. Missing data do not imply that there were no charter students in those years, only that the district was not included in the report.

#### **A Closer Look**

#### Washington, DC

Washington, DC has a thriving and highquality charter school movement. In fact, the city ranked first in the National Alliance's Health of the Movement indicators in 2014 and ninth in the model law rankings, which measures the strength of the legislation that dictates the parameters of how charter schools can operate within the state. 5 While the charter school enrollment share has increased from 25 percent in 2005-06 to 44 percent in 2014-15, the district-run public schools have also begun retaining their students and actually experienced a growth in enrollment last year. When the overall environment for charter and district-run public schools is healthy, having a high proportion of students enrolled in charter schools can have a positive effect on a city.

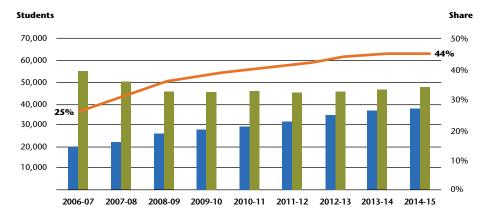

#### Kansas City, Missouri

Like many urban districts, Kansas City, Missouri has been experiencing a decline in its public school enrollment over the last decade. However, the decline is slowing. The number of students attending charter schools increased from about 6,500 in 2005-06 to nearly 10,000 in 2014-15. With the declining overall enrollment, this has led to a doubling of Kansas City's charter school enrollment share over the past decade—from 20 percent to 41 percent.

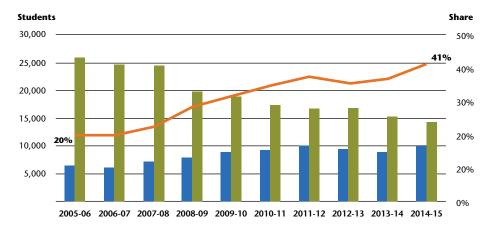

#### Los Angeles, California

The Los Angeles Unified School District is the second-largest public school district in the US. As the charter movement has taken hold within the district, the number of students attending charter public schools has nearly tripled in just seven years and was over 150,000 last year. Given the large size of LAUSD, charter public school students are just 23 percent of total enrollment.

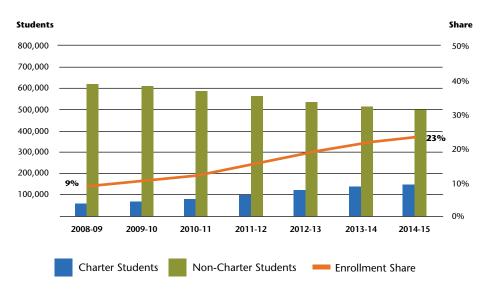

#### NINE-YEAR PUBLIC SCHOOL ENROLLMENT TREND IN WASHINGTON, DC, 2006-07 THROUGH 2014-15

#### TEN-YEAR PUBLIC SCHOOL ENROLLMENT TREND IN KANSAS CITY, MO, 2005-06 THROUGH 2014-15

#### SEVEN-YEAR PUBLIC SCHOOL ENROLLMENT TREND IN LOS ANGELES, CA 2008-09 THROUGH 2014-15

<sup>&</sup>lt;sup>5</sup> Todd Ziebarth and Louann Bierlein Palmer. (2014). The Health of the Public Charter School Movement: A State-By-State Analysis. http://www.publiccharters.org/wp-content/uploads/2014/09/health-of-the-movement-2014.pdf. And Ziebarth, Todd. (2015). Measuring Up to the Model: A Ranking of State Charter School Laws. http://www.publiccharters.org/wp-content/uploads/2015/01/model\_law\_2015.pdf.

#### Districts with the Greatest Number of Charter School Students

Los Angeles Tops the List Again in Number of Public Charter School Students. More than 150,000 students attended charter public schools in the Los Angeles Unified School District during the 2014-15 school year—the highest number for any school district in the country. In fact, the charter school enrollment for Los Angeles is more than double that of Philadelphia, the third highest charter school student enrollment (64,090). The number of students enrolled in public charter schools in Los Angeles alone would place Los Angeles charter schools in the top 15 of the 100 largest school districts in the United States.<sup>6</sup> Charter public schools in Los Angeles enrolled over 12,000 more

students in 2014–15 than in 2013–14—a growth rate of nine percent.

Ten Districts with the Largest Numbers of Charter Students Enroll Nearly One-Quarter of All Charter School Students. The ten districts with the largest number of students in charter public schools represent 22 percent of the total charter public school population nationwide—a total of nearly 640,000 students out of roughly 2.9 million. Between the 2013–14 and 2014–15 school years, the top ten districts increased charter public school enrollment by approximately 38,000 students—a growth rate of six percent.

The Number of Charter School Students in New York City Has Quadrupled Since 2008. In the last six years, the number of charter school students in the New York City public school district has grown from just over 20,000 to nearly 85,000.

Seven School Districts Have Reached at Least 50,000 Charter School Enrollment. For the first time, the number of public school students who attend charter public schools has reached more than 50,000 in Los Angeles, New York City, Philadelphia, Chicago, Miami-Dade, Detroit, and Houston.

The following tables present charter public school enrollment as the highest number of students enrolled, as well as ten-year trends in enrollment numbers.

Houston	TX	21%	51,400 (#7)
San Antonio	TX	30% (#10, tied)	17,000

#### **Notes about Methodology**

- 1. In this analysis, the National Alliance examined enrollment share in school districts with more than 10,000 public school students (both charter and non-charter) in the 2014–15 school year. The National Alliance gathered charter and non-charter public school enrollment data from state department of education databases and personnel.
- 2. More than 50 percent of charter schools nationwide are their own independent local education agencies (LEAs), rather than being part of traditional public school district LEAs. In the past, this fact meant that it was not always clear which public school district charter schools were physically located in, especially for charter schools in large metropolitan cities with more than one school district (e.g., Phoenix, Arizona, and Houston, Texas). For the five most recent editions of the market share report, the National Alliance used a geocoding method to identify the geographically relevant school districts for
- each charter more accurately. Specifically, the National Alliance geocoded every charter school that is an independent LEA to the geographically relevant traditional public school district LEA by mapping charter school addresses onto school district boundary maps available through the U.S. Census Bureau.
- 3. For Michigan, the National Alliance used student residential enrollment data that indicate the total number of students attending charter schools based on the district where students reside. The student residence enrollment data present information regarding how many students from a school district attend charter schools. Some students may attend charter schools outside of their traditional district boundaries. 2013-14 data for Detroit, Michigan and Cleveland, Ohio have been revised to remove computational errors.
- 4. The growing number of virtual charter schools enrolling children from across an entire state presents an issue. Because many states haven't developed student

enrollment reporting systems that allow for sorting individual students by community of residence at each charter school, the National Alliance excluded virtual school enrollment data from both the charter and total district enrollment data when calculating market share percentages. This decision might create some undercounting in school districts where large numbers of students are enrolled in virtual charter schools. The National Alliance coded virtual schools according to a nationwide list gathered from state department of education databases and personnel. The National Alliance does include enrollment from virtual schools in the District of Columbia and Hawaii, where there is only one school district in the state, and from Delaware, Michigan, and Ohio, where the National Alliance has resident enrollment data and knows the district where students live.

OUR MISSION IS TO LEAD PUBLIC EDUCATION TO UNPRECEDENTED LEVELS OF ACADEMIC ACHIEVEMENT FOR ALL STUDENTS BY FOSTERING A STRONG CHARTER SECTOR. THE NATIONAL ALLIANCE FOR PUBLIC CHARTER SCHOOLS PROVIDES ASSISTANCE TO STATE CHARTER SCHOOL ASSOCIATIONS AND RESOURCE CENTERS, DEVELOPS AND ADVOCATES FOR IMPROVED PUBLIC POLICIES, AND SERVES AS THE UNITED VOICE FOR THIS LARGE AND DIVERSE MOVEMENT.

1101 15th Street, NW Suite 1010 Washington, DC 20005
