As you enter the webinar, please answer the following questions in the Q&A box:

1. What aspect of your school climate do you most want to improve?
2. How often does your school collect and analyze discipline data?
About the National Charter School Resource Center

Webinar Logistics

- Use the chat feature for technical questions
- Use the Q&A box to ask questions and respond to audience questions
- Questions will be answered during Q&A following each presenter
- The webinar recording will be available on the NCSRC website by July 25, 2016.
- We will ask you to fill out a survey after the webinar concludes
Background

The U.S. Department of Education (ED), in partnership with the U.S. Departments of Justice and Health and Human Services, has worked closely with educators through the #RethinkDiscipline campaign to support initiatives that build positive school climates and develop less punitive approaches to school discipline.

School climate is a multi-faceted concept that describes the extent to which a school community creates and maintains a safe school campus; a supportive academic, disciplinary, and physical environment; and respectful, trusting, and caring relationships throughout the school community.
Introduction

Charter School Discipline: Examples of Policies and School Climate Efforts from the Field

Case Study: Student Discipline and School Climate in Charter Schools

Professional development information and tools to develop supportive classrooms and schools that prevent conflict and support the diversity of student needs
Agenda

- Welcome and Introductions
- Issues and Research Related to Student Discipline in Charter Schools
  - Dr. Robert Mayo and Dr. David Osher, American Institutes for Research (AIR)
  - Q&A
- City-wide Reform of Discipline Policies and School Climate
  - Naomi DeVeaux and Rashida Young, DC Public Charter School Board (PCSB)
  - Q&A
- Using Data to Change School Policies and Practices
  - Rachelle Roberts, Friendship Public Charter Schools
  - Q&A
Charter schools suspend a greater percentage of students than traditional public schools.

However, the suspension rate in charter schools is trending downward, declining to 6.5 percent in 2013-14 from 7.3 percent in 2011-12.

This decrease in suspensions occurred even with a broader definition of suspensions in the most recent collection.

Students of color still experience higher suspension rates in charter schools: 9.0 percent of students of color (American Indian/Alaska Native, Black, and Hispanic students) are suspended in charter schools versus 8.5 percent in traditional public schools.

By contrast, white students experience a lower suspension rate in charter schools. There is a 2.8 percent suspension rate for White students enrolled in charter schools, compared to a 3.7 percent White suspension rate in traditional public schools.
Recent Research Findings: The Charter School Sector (2 of 2)

- In all public schools, Black students are 3.8 times as likely to receive one or more out-of-school suspensions as White students.

- Students with disabilities, protected under the Individuals with Disabilities Education Act (IDEA), are more than twice as likely to receive one or more out-of-school suspensions in any public school as students without disabilities.

- Black students are nearly twice as likely to be expelled from any public school as are White students.
What Research Says About Punitive Discipline

Significantly increases the likelihood of students:

- Repeating a grade
- Dropping out
- And/or becoming involved in the juvenile justice system

Significantly decreases the likelihood of students:

- Receiving instruction
- Participating in class
- Completing work
- Participating in deeper learning
- Graduating
3 Years After Suspension:

- Students already had substantially lower pre-suspension achievement than did students in the comparison group.

- Although already behind, previously suspended students gained considerably less academically throughout 3 years with suspensions.

- Students had higher drop-out rates
  - Trends worse with:
    - Increases in suspensions
    - Decreases in achievement

Digging Deeper on Post-Suspension Harm (1 of 2)
3 Years After Suspension:

- Similar problems for children with emotional and behavioral disabilities and learning disabilities
- Impacts on suspended students persist
  - To college and through drop out
  - To the work place
- Appears to have collateral consequences for students who are not suspended in high suspending schools on math and literature grades
Suspension Can Exacerbate Other Problems

- Neglected and abused students more likely to be disciplined
- Students who have experienced trauma may be re-traumatized
- Student exposed to violence already may have problems with self-esteem
  - i.e., exposure to violence predicted decreased feelings of safety in the school and neighborhood and lower levels of parental support and involvement in school, which, in turn, was associated with lower student self-esteem and academic success
Creating a Safe, Disciplined, Productive Classroom

➤ Connect with every student
➤ Create a safe and non-humiliating space
➤ Build a classroom community that incorporates student voice
➤ Model and build social emotional competence
➤ Create and reinforce student success
➤ Differentiate support by being in each student’s zone of proximal development
➤ Focus on strengths
➤ Create and sustain learning vectors
The Changing Policy Landscape

- By Fall 2016, every state must submit a plan for implementing the ESSA requirements for approval by the U.S. Secretary of Education.
- Charter LEAs are expected to comply fully with the law unless state law explicitly exempts them.
- The plan must include assurances that it will meet this obligation.
- ESSA Sec. 1111 also gives states the flexibility to add school climate as an annual indicator of school quality or student success.
- ESSA Sec. 4106 states that before receiving funding LEAs must conduct a comprehensive needs assessment to examine data-grounded high-priority needs including the conditions for student learning necessary to create a healthy and safe school environment.
Countering Ambiguity

Defining Monitoring, Accountability and Capacity-building Roles & Responsibilities

- Authorizers
- Schools’ governing boards
- Individual school and/or CMO-wide leadership
- State Education Agencies
Implications for Charter Schools (1 of 4)

Periodic Policy and Programmatic Review and Revision

- Clear delineation of *fair, developmentally appropriate* and *minimally exclusionary* continuum of infractions, preventions, interventions and consequences
  - Tailored by developmental stages v. one size fits all
  - Suspensions and expulsions as last resorts
  - Strong attention to subjective v. objective infractions
  - Programs and initiatives aimed at supporting students in prevalent areas of need
  - Students’, families’ and educators’ roles and responsibilities

- Authentic engagement of key stakeholders in this process (e.g., students, parents, board members, and community partners)
Implications for Charter Schools (2 of 4)

Periodic Policy and Programmatic Review and Revision

Implementation of developmentally appropriate, culturally competent, and evidence-based social, emotional, and behavioral preventions and interventions, including but not limited to:

- Positive Behavioral Interventions and Supports (PBIS)
- Restorative Practices
- Social and Emotional Learning (SEL)
- Trauma-sensitive and informed care
- Early Warning Systems and Student Support Teams
- Counseling and social work supports
- Functional Behavioral Assessments and Behavior Intervention Plans
- Mentoring
Implications for Charter Schools (3 of 4)

Mine and Mind Your Data

➤ Formally collect, monitor, analyze and evaluate disaggregated discipline data trends on at least a quarterly basis to identify:
  ➤ Subgroups that may be experiencing comparatively high rates of suspensions and expulsions evidencing disparities and disproportionalities or potential implicit bias e.g., by race/ethnicity, special education status
  ➤ Building locations, grade levels, classrooms, times of day, peak months evidencing high rates of behavioral infractions
  ➤ Areas of strength that should be celebrated in a formal manner, reflected upon and used to improve school- or CMO-wide efforts
➤ Set data-driven rigorous, yet realistic annual climate, culture and discipline goals
Implications for Charter Schools (4 of 4)

Mine and Mind Your Data

- Map available resources aimed at supporting students’ social, emotional, and behavioral needs in an effort to identify, revisit and/or address:
  - Student support service delivery gaps and overlaps (schoolwide and for subgroups)
  - Necessary intra-school/CMO collaborative policies and procedures
    - SPED teams, discipline or school climate teams, and discipline decision-makers
  - Specific educators and families in need of additional supports
  - Necessary partnerships with families, public social service agencies and community-based organizations
  - Professional practices meriting individual and collective capacity-building via adjusted resource allocations (e.g., cultural and linguistic competency, restorative practices)

- Relationships, Relationships, Relationships!

  ▶ Q&A
There are 115 charter schools in Washington, DC, operated by 65 nonprofits and located in 102 separate facilities around the city.

These schools served 38,905 students in SY2015-2016.

Charter school market share growth over time
DC’s Landscape (2 of 2)

City-wide total enrollment is climbing after years of decline.
Transparency is Paramount

Authorizers should rely on an approach centered on transparency and dialogue with charter school leaders.

- Transparency surrounding difficult issues leads schools to improve their performance *without resorting to additional regulation*.

At DC PCSB, we preserve autonomy by:

- Collecting accurate discipline data;
- Making exclusionary discipline data public, accessible and transparent;
- Monitoring school discipline data;
- Requiring discipline policies that promote equity; and,
- Facilitating discussions about approaches to school discipline.
The Equity Reports promote transparency, equity and choice by providing unprecedented data about school performance.

The goal is to:
- address some of the most critical issues around equity in public education; and,
- foster conversations among stakeholders on areas of growth.

The result has led to:
- public charter and traditional schools working closely together and harmonizing data collection;
- a dramatic increase in the visibility and awareness of each school’s discipline rates; and,
- increased efforts by schools to decrease the rate of out-of-school suspensions and expulsions.
Equity Reports Help Dispel Charter School Myths in DC

The 115 charter schools serve the highest-needs students at higher levels than the 113 traditional public schools in DC.

* Public charter sector’s MYW calculation using current business rules was 5.4% for SY 12-13 and 5.5% for SY 13-14.

**The state aggregate Equity Report does not omit adults and closed schools from the overall state rate, whereas they are omitted from the sector and individual school rates.
Takeaways

Key Takeaways

- Data transparency is essential to impel action that leads to policy changes and dispel myths.
- Charter school authorizers can use a variety of strategies to preserve school autonomy.
- Examining school data leads to improved school culture.
